

Art & Design

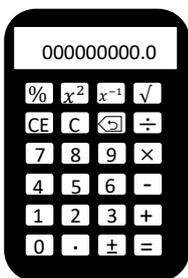

National 4, National 5, Higher, Advanced

What is Art & Design?

Art & Design is a HUGE subject and covers a wide range of topics. We work on 2D and 3D projects which include: drawing and painting, sculpture, printmaking, graphic design, fashion and textiles and jewellery design. We also look at the social and cultural influences upon artists/designers which gives the opportunity to research the relevant history. Art & Design will stretch creative minds and give every learner a chance to express themselves. Skills are transferable as we encourage all pupils to think creatively and to be an independent learner. Pupils will develop their ICT skills and embrace new technologies Problem-solving and self-evaluation skills will be honed and most importantly, all learners have a great sense of achievement. "The earth without Art is just eh"

Skills

Numeracy

- proportion
- measurement
- 3d construction

Thinking

- understanding
- analysing
- applying

Literacy

- researching
- note taking
- analysis
- personal opinion

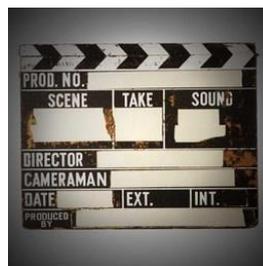

Team building

- problem solving
- communication
- creating

Careers

- Artist
- Graphic Designer
