

Use the circles to help you with your learning

😊 I know this well

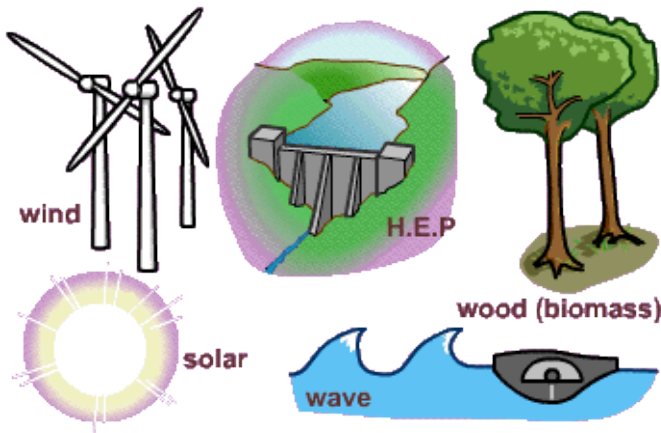

😐 I know this a bit

☹️ I don't know this yet

I know that other sources of energy are needed to supply energy requirements

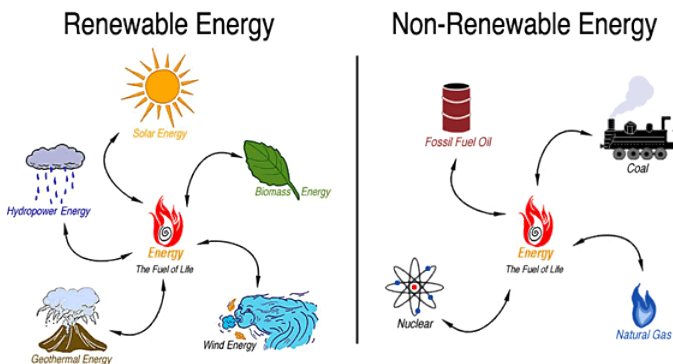

I know that some alternative energy sources might be: wind, solar, tidal, hydro and geothermal

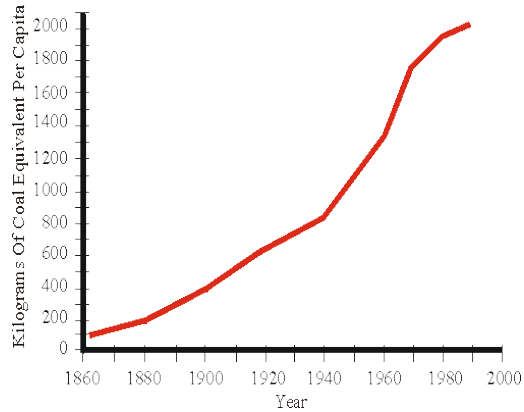

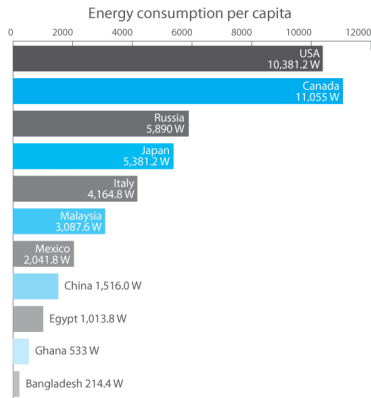

I can discuss the benefits and potential problems of renewable sources

I know the difference between renewable and non-renewable energy sources

I know an understanding of the amount of energy used by society and the ethical issues surrounding energy usage

I know the risks and benefits of a range of energy sources including their impact on global warming/climate change
